

Space Saver

Kitchen Plinth Heater - discover the hidden benefits

Space Saver - Plinth Heater

The **Space Saver** plinth heater from Smith's brings efficient, controllable heating to areas where space maybe limited.

Smith's Space Saver replaces your old radiator and fits in the plinth under your kitchen cupboards.

Choosing a Space Saver means you can have the kitchen you want – more storage, more work-surface, more appliances! A much more affordable, controllable alternative to underfloor heating, this discreet heater runs off your central heating system to provide instant warmth.

Don't let looks fool you, this is not an electric heater, this plumbs in like a radiator but takes up a fraction of the space. So you can have the kitchen you really want, with more space and more comfort!

Features

- Makes room for extra kitchen storage, work space, or additional appliances
- More affordable than underfloor heating
- Get the flooring you want
- Discreet heating
- Easy to use
- Suitable for plinth heights from 80mm upwards
- Contemporary design with a wide choice of grille colours to suit interior decoration
- Two heat outputs and fan only option for instant heat and cool air circulation
- Low voltage bathroom model available for high humidity areas
- Free five years parts and labour warranty

Easy to use

Smith's Space Saver comes on and off with your central heating, just like the rest of your radiators do. It uses the same water that your radiator uses, just a lot less and it has a tiny energy efficient electric fan that pushes out the heat into the room.

How many do I need?

As a rule of thumb, for every radiator you remove, install one Space Saver. If you need further help, go to our website to read our installation guides, email us or give us call.

Is it quiet?

The sound is very similar to that of your fridge and we think you won't notice it as you go about your daily life in your kitchen, boiling kettles, running taps, chatting with friends.

Is it expensive to run?

Not at all. Because the heat comes from your boiler (hydronic version) the only extra is the running cost of the fan - it costs 1p a day to use a Space Saver in your kitchen.

Can I find out more?

Just visit our website for more information and a list of stockists. Any questions, please contact us directly.

How a Smith's Space Saver works

Hydronic:

Hot water from your central heating system passes through a heat exchanger transferring its heat to the aluminium fins. Cooler air is drawn in by the fan and heated as it passes through the heat exchanger before being expelled gently back into the room.

This not only gives a more even temperature spread, but will heat up a room quicker than a traditional panel radiator.

Hydronic Low Voltage:

Functions in exactly the same way as a hydronic models but uses a transformer to ensure the product is safe to operate with wet hands.

Hydronic/Electric:

Like a hydronic model but also includes an electric element so you can still use the product when the central heating system is switched off.

Electric:

Plugs into a standard electrical socket when there isn't access to the central heating system. Electric heaters cost approx. 15p per kWh to run.

Alternative grille finishes

Most Space Saver models are supplied with a detachable Stainless Steel fascia grille.

Alternative colours are shown below (grilles are shown for colour reference only and switch configuration varies by product).

Space Saver data

Model	Room size guide (m ²)	Heat Output		Sound levels		Fascia grille finish	Fan-only	Minimum plinth height (mm)
		Normal (KW)	Boost (KW)	Normal (dBA)	Boost (dBA)			
Hydronic								
SS80	24	0.8	1.1	32	40	Stainless Steel		80
SS3	31	1.1	1.4	26	39	Stainless Steel	•	100
SS5	37	1.3	1.7	27	43	Stainless Steel	•	100
SS7	46	1.6	1.9	30	44	Stainless Steel	•	100
SS9	63	2.2	2.4	41	46	Stainless Steel	•	100
Hydronic Low Voltage								
SS5 12V	33	1.3	1.7	31	39	Stainless Steel	•	100
Hydronic/Electric (Dual)								
SS5 Dual (in hydronic mode)	37	1.3	1.7	27	43	Stainless Steel	•	100
SS5 Dual (in electric mode)		1.0	-					100
Electric								
SS3E	58	1kW/2kW/3kW		42		Stainless Steel	•	100
SS2E	29	1kW/2kW		42		Stainless Steel	•	100
SS80E	18	0.6kW/1.2kW		38		Stainless Steel	•	80

Performance can vary due to operating conditions, please refer to the technical data sheet for further information.

Heat outputs tested in accordance with BS4856 using entering water temperature and 340 l/h (75gph) flow rate.

Heat outputs shown above are at 80°C entering water.

Fan-only option operational only when central heating system is switched off.

Dual models include an electric element which in electric heating mode will emit 1kW of heat. Sound levels measured at 1.5m.

Happy to help

Smith's Environmental Products Ltd is one of the leading manufacturers of heating and cooling products in the UK. We are committed to achieving the highest standards and our faith is supported by a free parts and labour guarantee with every product (see our website for more information). Our customer service is second to none and we are happy to offer any help and guidance that you might need.

Stockists

All products are available nationally from Builders' Merchants, Plumbers' Merchants, Heating Equipment Distributors and Kitchen Equipment Distributors. In the event of difficulty, please contact us or visit our website SmithsEP.co.uk for details of your nearest stockist.

Information and advice

Full technical specifications and list prices are available to download from our website or in hard copy from our office. Also available on our website are price lists, individual product data sheets, installation & user guides, where to buy, who to contact and a media centre.

Alternatively contact our office 9.00am to 5.00pm Monday to Friday.
